Note:

Are Client Counts Unduplicated?

Duplicated across Community, RPTC & Hospital/Other Inpatient. See General Notes.

Number of States with Unduplicated Counts 43

Duplicated between Hospitals and Community

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2014

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Assigned age as of middle of the reporting period; for SFY 2015: Age as of December 31, 2014. 240 of the clients with Age = N/A are adult clients (age subgroup N/A) who received Illness Self Management (ISM) services in Community-based setting.

Gender None

Race See General Notes

Overall Client counts include individuals who received Illness Self Management (ISM) services in Community-based setting. FY15 ISM count = 2,974 (2,891 SMI and 83 SED); 240 of these are adult ISM with Age Subgroup = Not Available. See General Notes.

Table 2b

Age Assigned age as of middle of the reporting period; for SFY 2015: Age as of December 31, 2014. 240 of the clients with Age = N/A are adult clients (age subgroup N/A) who received Illness Self Management (ISM) services in Community-based setting.

Gender None

Race See General Notes

Overall See General Notes. Client counts include individuals who received Illness Self Management (ISM) services in Community-based setting. FY15 ISM count = 2,974 (2,891 SMI and 83 SED); 240 of these are adult ISM with Age Subgroup = Not Available.

* Reported under Hispanic Ethnicity.

Forensics included in "non forensic" data? No

Note:

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

State Hospital is Alaska Psychiatric Institute (API). Age as of Date of Admission. All patients who have readmissions within 30 days are also counted in the column for readmission within 180 days.

Structure Domain: Federal Mental Health Block Grant Expenditures for Non-Direct Service Activities, FY 2015
Alaska

Service	Non-Direct Block Grant Expenditures	% Total	US % Total
Technical Assistance Activities	-	-	31.8%
Planning Council	\$43,875	86.1%	4.5%
Administration	\$7,054	13.9%	26.3%
Data Collection/Reporting	-	-	9.2%
Other Activities	-	-	28.3%
Total	\$50,929	100.0%	100.0%

Note: This table use data from URS Table 8.

State Notes:

None

STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2014**STATE Alaska**

	Expenditures: State	Percent of Total Expenditures: State	Expenditures: U.S.	Percent of Total Expenditures: U.S.
State Hospitals-Inpatient	\$27,202,302	12%	\$9,377,004,070	23%
Other 24-Hour Care	\$86,062,574	38%	\$7,332,863,616	18%
Ambulatory/Community	\$106,885,300	47%	\$23,267,025,494	57%
Total	\$226,522,776	-	\$40,831,941,068	-

Note:

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2014 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:
<http://www.nri-incdata.org/>

STRUCTURE DOMAIN: State Mental Health Agency Controlled Revenues by Funding Sources, FY 2014

STATE Alaska

Funding Source	Ambulatory/Community			State Hospital		
	State Revenues	Percent Total (State)	Percent Total (US)	State Revenues	Percent Total (State)	Percent Total (US)
Medicaid	\$154,074,800	80.6%	59.0%	\$10,027,635	30.9%	22.6%

Alaska

URS Table Number	General Notes
All	Reporting year is State Fiscal Year (SFY) 2015, except for Consumer Survey Tables; for these tables, the survey period is during CY 2014.
All	Data Sources and Limitations: Community Programs: The Division uses an electronic health records system (the Alaska Automated Information Management System (AKAIMS)) to collect and report Community Program data. However, AKAIMS does not include information on youth or adults who receive illness self-management (ISM) services. Starting in SFY12, the number of individuals who received ISM services (based on grantee quarterly reports) was added to the AKAIMS counts for the total number individuals who received services. Due to this change in methodology, caution should be exercised when making comparisons with prior year data. The Division has improved data collection and reporting of demographic information for clients receiving ISM services; however, many of these clients are still included in the "Not Available" category for age, gender, race, ethnicity, employment status, and living situation. The unduplicated counts of "clients served" reflect the number of clients who received services through program enrollment. These counts do not include clients who received a mental health service but were not enrolled in a program. Important Notes: Starting in SFY15, the AKAIMS counts of persons served reflect unduplicated client counts within and across agencies; prior year counts were unduplicated at the agency level, but duplicated across agencies if a client received services from more than one agency. Starting in SFY15, the count of persons receiving ISM services also reflects reduced duplicate counting (i.e., across the quarterly reports). Most of the decrease (from SFY14 to SFY15) in the reported number of clients receiving community-based mental health services reflects these changes in reporting methodology. In addition, there was an actual decrease in the number of persons served; this decrease reflects a number of challenges faced by agencies, including difficulty recruiting and retaining staff and funding issues impacting capacity. The decrease also reflects data coding and reporting issues within AKAIMS specific to a couple of agencies.
All	State Psych Hospital: Data source is the Alaska Psychiatric Institute (API) electronic health records system: Meditech.
All	Other Psych Inpatient: This includes Designated Evaluation & Treatment (DET) and Acute Psych: DET: High Risk Inpatient Psychiatric Diversion from API. Data is collected and reported using an Access database. SFY15 DET data is not yet available; the SFY15 URS Tables include the SFY14 DET data for clients that had an inpatient stay at a DET facility (client count is based on paid claims only). Acute Psych: Data is from the New MMIS-Cognos Decision Support System (Medicaid claims data). It includes in- and out-of-state clients. The unduplicated client count is based on paid Medicaid claims.
All	RPTC: Data is from the MMIS-Cognos Decision Support System (Medicaid claims data). Includes in- and out-of-state clients. The unduplicated client count is based on paid Medicaid claims.
All	Age: Unduplicated Counts: For Community Program unduplicated client counts, age is assigned as of the middle of the reporting period (SFY 2015 = Age as of December 31, 2014). For API, Other Psych Inpatient, and RPTC unduplicated client counts (except those in Table 6), age is assigned as of the middle of the reporting period; the Table 6 unduplicated counts have age (child vs adult) assigned as of the date of admission. Age - Duplicated Counts: For all duplicated client counts, age is assigned as of the date of admission.
All	Race/Ethnicity: For Community Programs, Acute Psych, and RPTCs, 'Hispanic' data is collected separately from 'Race' data (i.e., two separate questions); for API, 'Hispanic' was collected as part of the 'Race' question; and for DET, neither 'Race' nor 'Hispanic' data was collected. For consistency in reporting in the URS Tables, the API counts of 'Hispanic' (as a 'Race') were instead entered as being a 'Hispanic' response to the Ethnicity question and were assigned 'Race Not Available'; the balance were assigned an Ethnicity of 'Hispanic Origin Not Available.' All of the DET counts were assigned an Ethnicity of 'Hispanic Origin Not Available.'
4	Employment Status: Starting in SFY14, the methodology for reporting the most recent employment status changed from using the AKAIMS Admission/Discharge data to the Client Status Review (CSR) data. The CSR is administered at admission, periodically during treatment (every 90-135 days), and at discharge.

URS Table Number	General Notes
5A/5B	<p>Funding Support - Medicaid Status: for consistency in reporting across service settings, the rows reflect "Primary Expected Payment Source" = Medicaid or Non-Medicaid. We are not able to identify clients with Medicaid Only, Non-Medicaid Only, or both Medicaid and Non-Medicaid. For most clients, we are able to determine if their primary expected payment source is Medicaid or Non-Medicaid. In the row labeled "Medicaid Only", we are reporting the number of clients with "Primary Expected Payment Source = Medicaid", and in the row labeled "Non-Medicaid Only", we are reporting the number of clients with "Primary Expected Payment Source = Non-Medicaid". We used the following methodology for each service setting: For Community Programs: In AKAIMS, the primary expected payment source is collected. If the client's primary expected payment source is Medicaid, then the client is counted under "Medicaid only"; if the client's primary expected payment source is not Medicaid, then the client is counted under "Non-Medicaid only". Starting in SFY13, the clients receiving ISM services are counted under "Non-Medicaid only" because clients are not charged for these services (note: in SFY12, clients receiving ISM services were counted under "Medicaid Status Unknown"). For State Psych Hospital (API): The primary and secondary insurance types are collected. If the client's primary insurance type is Medicaid, then the client is counted under "Medicaid Only" if the client's primary insurance type is not Medicaid, then the client is counted under "Non-Medicaid Only" (this includes clients who have Medicaid as a secondary insurance type). RPTCs and Acute Psych: Data is from the New MMIS-Cognos Decision Support System (Medicaid claims data); the assumption is made that the primary expected payment source for all clients is Medicaid, so all clients are counted under "Medicaid only". For DET: The primary expected payment source is not Medicaid; all DET clients are counted under "Non-Medicaid only".</p>
6	<p>State Hospital: In SFY14, API closed their children's unit on a short term basis, resulting in decreased youth admissions and discharges. In SFY15, the number of youth admissions and discharges increased, reflecting the demand/need for services by this target population. Also in SFY15, average length of stay (LOS) generally increased, reflecting a change in administrative practices to retain patients longer in an effort to reduce recidivism. Also, in general, API has relatively few patients with long LOS, and depending on when these patients are discharged, the average and median LOS may vary considerably from year to year. Other Psychiatric Inpatient: In SFY15, NorthStar Behavioral Health System reduced their residential services to youth and opened a unit for active military and veterans; the decrease in the number of youth admissions and discharges reflects this transition. RPTC: The SFY15 general increase in average LOS reflects the longer LOS of behavioral health clients with developmental disabilities (DD). We continue to see individuals with DD being funneled into the behavioral health system, many of which end up in out-of-state RPTC's due to the difficult cases and types of services these individuals need. Note: relatively few adults receive treatment at RPTCs; consequently the average and median LOS for adults may vary considerably from year to year. Community: The SFY15 decrease in the number of program enrollments is consistent with the decrease in the number of persons who received mental health services in the community-based setting as noted above.</p>
12	<p>Percentage of Persons Served who has a Dual Diagnosis (Co-Occurring Mental Health and Substance Abuse): we are not yet able to report the count or percentage of clients who have a Dual Diagnosis. For Community-Based Services, we are able to report counts and percentages of clients who are "Treated for Co-Occurring Disorders". The counts of clients treated for co-occurring disorders are based on the client's admission record program type assignment of "Treating here for Both Mental Health & Substance Abuse". Starting in SFY15, the number of clients "Treated for Co-Occurring Disorders" includes persons with co-occurring disorders who received ISM services. The SFY15 increased percentage of clients treated for co-occurring disorders reflects this change.</p>
15	<p>Living Situation: Starting in SFY14, for Community Programs, the methodology for reporting the most recent living situation changed from using the AKAIMS Admission/Discharge data to the Client Status Review (CSR) data. The CSR is administered at admission, periodically during treatment (every 90-135 days), and at discharge.</p>
16	<p>EBP data is reported for Community Setting only: the Division is working to improve data collection and reporting capability relative to clients receiving EBP services. Also, until we are able to report demographic information for all clients receiving the specific EBP services, the client counts in Table 16 are included in the "Not Available" category for age, gender, race, and ethnicity (as requested by NRI). Supported Employment: The SFY15 decrease in the number of persons receiving Supported Employment (SE) reflects the following: (1) there were fewer people referred to SE and/or fewer people following through with referrals to SE; (2) stricter adherence to the definition of SE; and (3) one agency that were providing SE went bankrupt.</p>
17	<p>EBP data is reported for Community Setting only: The Division is working to improve data collection and reporting capability relative to clients receiving EBP services. Also, until we are able to report demographic information for all clients receiving the specific EBP services, the client counts in Table 17 are included in the "Not Available" category for age, gender, race, and ethnicity (as requested by NRI). Illness Self-Management: Three agencies provided Illness Self-Management (ISM) Services; two of the three agencies increased the number of persons receiving ISM services, and one agency had little or no change. The SFY15 decrease in the reported total count of persons receiving ISM services reflects reduced duplicate counting (i.e., across the quarterly reports) by the agency with little or no change in the actual number served.</p>
